

EHR GOVERNANCE SYMPOSIUM

Cybersecurity: Risk Mitigation and Preparedness Strategies for Health Care Professionals

March 14 & 15, 2018

8:15am – 4:00pm

Hilton Long Beach

**701 W Ocean Blvd.
Long Beach, CA**

Cyber-attacks are on the rise and health care organizations continue to be targeted. Criminal attacks have become a root cause of recent data breaches.

Governing the security, integrity, privacy, and content of the electronic health record is the responsibility of HIM and HIT professionals. Establishing safeguards to protect the organization's greatest asset – protected health information – is imperative.

Learn risk mitigation strategies and breach prevention best practices from industry experts.

This symposium will provide an operational response to dealing with a cyber-attack and prepare HIM and HIT professionals with the tools necessary to respond.
